

Wellspring began selling Urology supplies to professionals in 1992. With a combined 57 years of experience, we are confident that we can meet your product needs perfectly. So we offer a **100% COMPLETE SATISFACTION GUARANTEE** on all your purchases, including refurbished instruments.

Our expertise helps us to choose manufacturers who meet your exact needs with the highest quality instruments. If you have questions about which products are best for you, we can answer the.

If you need a product that you do not see here, please call us at 800-862-8661 or email us at sales@wellspringurology.com. We can also help you with questions about techniques for using instruments, whether you purchased them from us or not.

ScopeHolster™

Wellspring's ScopeHolster™ (patent pending) allows for the elimination of the large blue boats that use up your counterspace and let the caustic smell of the disinfectant escape each time you remove the large lid. **Add only one quart of Cidex® – not one gallon.**

- One-piece non-breaking tube
- Aluminum mounting bracket
- Secure tube holder
- Cap to reduce evaporation
- Easy to clean
- Surface mount or IV pole
- Suitable for cystoscope and uretroscope
- **Lifetime Guarantee**

Vasectomy Instruments

No-scalpel vasectomy – This method of vasectomy, which was developed in china, does not use a scalpel. After the anesthetic is injected, the doctor pierces the skin of the scrotum with a sharp clamp, and then gently stretches the opening so that the tubes can be reached and blocked. No stitches are needed to close the tiny holes. There is very little blood and fewer complications than when the scalpel is used. This procedure accounts for nearly one-third of all vasectomies in the United States.

Stainless Steel Hooklet #10-200

5" Stainless Steel Scissors #03-035

Stainless Steel Loop/Ring Clamp #28-305

Stainless Steel Clamp cvd/sharp #28-300
